

CHINA SURFACE ENGINEERING Vol.23 (2010) General Catalog

• Special Designation •

- Development and Key Manufacture Technique of Functional Surface Structures for Heat Transfer.....(1-1)
Remanufacture Engineering and Its Development in China.....(2-1)

• Foreign Paper •

- Current State and Challenges of UK Surface Engineering.....(6-1)

• Engineering Foreland •

- The Development and Key Problems of Plasma Immersion Ion Implantation and Deposition.....(1-9)
Research State and Development Trend of Functional Surface Structures for Reaction in Manufacture Field.....(2-7)
Large Area Optical Grade Freestanding Diamond Films: Deposition Characterization, and High Technology Application Prosperous.....(3-1)
Discussion About Military Aircraft Anti-corrosion and Calendar Life Research.....(4-1)
Recent Status of Surface Treatment of Ni-based Superalloys with High Al and Ti Content by Laser and Electrospark Fusion Welding Process and the Way to Solve Welding Cracking.....(5-1)
Normal and Shear Fatigue Fracture Modes of Circular Coil Spring and the Approach of Improving Fatigue Fracture Resistance.....(6-7)

• Surface Engineering Research •

- Al-doped ZnO (ZAO) Films Prepared by Middle-frequency Alternative Magnetron Sputtering.....(1-15)
Properties of Air Plasma Sprayed Al_2O_3 -3 % TiO_2 Coatings.....(1-19)
Pretreatment on Electrodepositing of Titanium and Titanium Alloys.....(1-24)
The Effect of Temperature on Microstructure and Surface Topography of Tungsten Prepared via Chemical Vapor Deposition Approach.....(1-30)
Mechanical Properties of (Ti, Al)N Films Deposited by Reactive Magnetron Sputtering.....(1-34)
Processing Continuous Submicro/Nano SiC Fibers by Electrospinning.....(1-39)
The Effect of Internal Oxidation from Serpentine on Generating Reconditioning Layer on Worn Ferrous Metal Surfaces.....(1-45)
Research on Nanostructured Ceramic Coatings by Suspension Plasma Spraying and Conventional Plasma Spraying.....(1-51)
Corrosion Resistance Performance of Epoxy Zn-Al-Mg-Ce Alloy-riched Coating.....(1-57)
Observation Test and Comparison of Cathodic-Arc TiN Film.....(1-63)
Improvement and Developing Direction of Activation Technology for Electroless Plating of Nonmetallic Materials.....(1-69)
Microstructure and Tribological Properties of Zn/ZnS Layer in Air and Vacuum Environment.....(1-75)
Oxidation and Hot Corrosion Behavior of NiCrAlY Coating Prepared by a Diffusion Method.....(2-15)
Characterization of the Microstructure of Atmospheric Plasma-sprayed FeAl Intermetallics Using Mechanically Alloyed Fe-Al Powder.....(2-20)
Preparation and Drilling Properties of TiAlN Coated HSS Twist Drill.....(2-26)
Laboratory Simulation Study on the Corrosion in Splash Zone of the Thermal Sprayed Zn Coating.....(2-30)
Tribological Properties of Graded Metal-doped and Nanoscale Multilayered Modulation Diamond-like Carbon Films.....(2-36)
Study on the Tribological Properties of the Waterborne Epoxy Bonded Solid Lubricating Coating.....(2-42)
Numerical Simulation on Wrinkling Phenomenon of Thermal Barrier Coatings.....(2-46)

- Study on Tribological Performance of Ti6Al4V Alloy by Air Plasma Based Ion Implantation.....(2-50)
Effect of Ni Content on the Structure and Properties of Laser Surface Clad Ni-Fe Based Alloys.....(2-56)
Influence of Al_2O_3 Content on the Microstructure and Properties of TiO_2 - Al_2O_3 Ceramic Coatings by Plasma Spraying.....(2-60)
Microstructure Change of WC Particles Reinforced Nickel Based Alloy Laser Cladding Coatings during Heat Treatment.....(2-64)
Microstructure and Performance of Wear-resistant Coating on Deposited Surface by Rapid Forming.....(2-69)
Attachment Performance of Ectocarpus on Nano- TiO_2 /FEVE Fluoro-carbon Coatings.....(2-74)
Establishing TBC Random Pore Model Based on Random Media Theory.....(2-78)
In-situ and Secondary Surface Chemical Modification of Nano-scale Hydroxyl Magnesium Silicate.....(2-82)
The Fabrication of PP-nanoparticles Monolayer and the Measurement of Elastic Properties.....(2-86)
Effect of Heat Treatment on Microstructure and Properties of Cold Sprayed Iron Coating.....(2-90)
Factors Influencing Heat Wastage Efficiency and Film Quality of Micro-arc Oxidation on AZ91D Magnesium Alloy.....(2-95)
The Thermal Molten Iron Resistance Performance of Plasma Sprayed ZrO_2 Stability of CeO_2 - Y_2O_3 Ceramic Coating.....(3-10)
The Effect of Carbon Nanotubes- TiO_2 Hybrid on Tribological Behaviors of Poly (Furfuryl Alcohol) Composite Coatings.....(3-14)
The Study of Chemical Bonding Between Epoxy Resin Coating and Carbon Steel.....(3-21)
Influences of Sputtering Parameters on the Composition and Microstructure of CuInGa Precursors.....(3-25)
Preparation and Tribological Properties of Surface Modified Calcium Borate Nanoparticles.....(3-29)
The Corrosion Resistance Properties of CrTiAlN Coating by Unbalanced Magnetron Sputtering.....(3-33)
Study of Magnetron Reactive Sputtering CrN_x Decoration Films with sFunctional Protection.....(3-38)
Effects of SiO_2 Nanoparticles in Electrolytes on Growth Process and Surface Properties of Alumina Coatings Formed on 7A52 Aluminium Alloy by Micro-arc Oxidation.....(3-42)
Effect of Pre-stress on Heat Treatment Behavior of Hydroxyapatite Coating.....(3-46)
Effect of Nickel Rare Earth Alloy on Property of FeCrMoCBSi Amorphous Coating.....(3-51)
The Micro-hardness Analysis of Self-repairing Film Formed by Nano-Cu.....(3-56)
Plasma Nitriding of 42CrMo Steel with a Nanostructured Surface Layer Induced by Surface Mechanical Attrition Treatment.....(3-60)
Microstructure and Tribological Behavior of Laser Cladding NiCr/Cr₃C₂-Ag-BaF₂/CaF₂ Self-lubrication Wear-resistant Metal Matrix Composite Coating.....(3-64)
Settlement of Marine Algae and Morphology of PTFE/FEVE Fluorocarbon Antifouling Coatings.....(3-70)
Microstructure Design of Controlling Crack of Fe-based Laser Cladding Layer.....(3-74)
Effect of Nitrogen Partial Pressure on Structure and Properties of AlN/Al Protective Coatings on NdFeB by DC Magnetron Sputtering.....(3-80)
Characteristic of High Efficiency Supersonic Plasma Spraying Particles and Coatings.....(3-84)
Fretting Wear Behavior of TiN/Ti Composites Formed at Elevated Temperature.....(3-89)
Reactive Magnetic Sputtering MoSiCN Hard Film and Its Characterization.....(3-95)
Impact Wear Performance of TiN Film Grown on Ti Alloys by

Unbalanced Magnetron Sputtering.....	(4-7)
Preparation and Characterization of Si-doped Diamond-like Carbon Films.....	(4-11)
TiMo Alloy Film and Ti-Mo Multilayer Films Prepared by Ion-beam Enhanced Deposition	(4-15)
Influence of Interface Diffusion Barrier Films on Properties of Thermal Barrier Coatings (TBCs).....	(4-22)
The Effect of Cr-doped and Cr Buffer Layer on the Adhesion of DLC Film.....	(4-26)
Effects of Particle Size on Low Pressure Plasma Spraying Thick W Coating.....	(4-29)
Thermal Parameters Research of Laser Cladding Ni60-Cr ₃ C ₂ Cermets on Surface of Hot Forging Dies.....	(4-35)
Fe-based Alloy Design in Rapid Prototyping by Plasma Arc Overlaying and its Structure and Performance Investigation.....	(4-39)
Study on Rotational Fretting Tribological Properties of LZ50 Steel by Low Temperature Ion Sulphuration.....	(4-44)
High Temperature Oxidation Surface Morphology of Al-Si Coating on Nickel-base Superalloy.....	(4-48)
Effect of Substrate Bias Voltage on Plasma Nitriding Behaviour of AISI 1045 Steel.....	(4-52)
Effects of Process Parameters on Layer of Plasma Chromizing on Q235 Steel.....	(4-56)
Effect of Thermal Treatment on Microplasma Sprayed HA Coating	(4-60)
Correlation Between Energy Density and Variation of Products in Wire Explosion.....	(4-65)
Temperature Analysis of a New Nozzle in Coal-water Slurry Gasifier and Application of Anti-erosion Coatings.....	(4-70)
The Influence of Structure and Mechanical Performance in Application of Zincing by Aid of Mechanical-energy on the High-tensile Steel	(4-74)
Research of New Test Method for High Temperature Erosive Wear	(5-17)
Effect of Bath Temperature on the Properties of CdS Thin Film Deposited by Chemical Bath Deposition.....	(5-21)
Molecular Dynamics Simulation of Contact Mechanics Between Nanoscale Rough Surfaces.....	(5-27)
The Effect of the Effective Fluorination Treatment on Properties of the Catalyst of Chemical Hydrogen Generation.....	(5-32)
The Properties of NiAl Intermetallic Compound Coating Synthesized by Laser Cladding.....	(5-36)
The Effect of Laser Shock Surface Processing on Mechanical Properties of Welded Joints.....	(5-41)
Microstructure and Wear Resistance of In-situ Synthesis TiC Particulate Reinforced Metal Matrix Composite Coating by Argon Arc Cladding	(5-45)
Characterization of the Microstructure of Atmosphere Plasma-sprayed Mullite Powders and Coatings.....	(5-49)
Performance of Ultrafine WC-12Co Coatings Sprayed by Supersonic Plasma Spraying.....	(5-54)
Study on Effect of Plasma Treatment and Curing Condition on Dynamic Mechanical Properties of Carbon Fiber Composite.....	(5-59)
Effects of Surface Nano-crystallization on Mechanical Properties of 304 Stainless Steel/CrN Film.....	(5-64)
The Effects of Low Temperature Annealing on the Property of Brush Plated Nanocrystalline Ni-Co Alloy Coating.....	(5-68)
Investigation on Tribological Properties of Forged CoCrMo Alloy After Carburizing.....	(5-73)
Electrochemical Localized Corrosion Behaviour of Friction Stir Welded Seam of 7A52 Aluminum Alloy.....	(5-78)
Measurement of Radial Distribution of Plasma Arc Anode Pressure by Water-cooled Copper Anode Method.....	(5-82)
Investigation of Microstructure and Oxidation Resistance of CrAlN Composite Coatings on Piston Rings.....	(6-15)
Self-repairing on Steel with In-Sn-Zn Soft Metal Repairing Lubricant	

and Its Tribological Properties.....	(6-20)
Effects of Rare Earth on Microstructure and Corrosion Resistance of Hot-dip Aluminum Coating.....	(6-24)
The Contact Resistance and Corrosion Resistance of CrNx Film Deposited by Magnetron Sputtering.....	(6-30)
Study on Electrodeposition of Al from Trimethylphenylammonium Chloride (TMPAC)-Aluminum Chloride(AlCl ₃) Ionic Liquids + Benzene	(6-34)
Microstructure and Property of Laser Cladding Ni-based Alloy Coating Reinforced by WC Particles.....	(6-40)
Tribological Properties of DLC Coating on Surface of Ultra-high Molecular Weight Polyethylene.....	(6-45)
The Effect of Dispersion Media on Electrophoretic Coating of Hydroxyapatite on Pyrolytic Carbon.....	(6-51)
The Formation Mechanism of Non-uniform Structure for The Thermal Spraying Nanostructured Feedstock Prepared by Spray-drying Method	(6-57)
Preparation of HAP Coating on the Surface of NiTi Alloy via External Electrical Treatment.....	(6-61)
Investigation on Turbulent Arc in the Process of Electric Spark Automatic Strengthening.....	(6-66)
Study on FeS Solid Lubrication Layer with Micron/Nano Structure Prepared by ASPS Technology.....	(6-70)

• Remanufacture Engineering Research •

Powder Metallurgy Repair-Remanufacturing of High Temperature Alloy Bucket.....	(1-80)
New Development of Nanocomposite Electro-brush Plating Technique Which Facing the Equipment Remanufacturing.....	(1-87)
Microstructure and Friction and Wear Properties of Laser Cladding Fe-based Alloy Coatings on Brake Disc of Deep-well Drilling Rig	(1-92)
Study on Microstructure and Property of Laser Forming Repaired ZL104 Alloy.....	(1-97)
Research and Development of Microwave Repair Technology.....	(2-100)
Progress in Life Prediction of Remanufacturing Blanks by Using Metal Magnetic Memory Testing.....	(2-106)
An Automatic High Velocity Arc Spraying Technology Applied to Remanufacture Engine Crankshaft.....	(2-112)
CrN Films for Surface Coatings of Engine Piston Rings.....	(3-102)
Study on Relationship Between Wear and Rolling Fatigue Crack of Wheel/rail and Prevention Measures.....	(3-106)
The Research on Cleaning Technique for Aero-engine Compressor Blade.....	(4-78)
Influence of Manufacturing Process on Metal Magnetic Memory Signals in Ferromagnetic Materials.....	(4-82)
Improvement and Experimental Verification on Seal Waterproof of Formation Flight Lights on a Certain Transport Plane.....	(5-86)
Connotation and Technology Framework of Machine Tool Remanufacturing and Comprehensive Upgrading.....	(6-75)

• Applications •

[Example 14] Microplasma Electrolytic Oxidation Technology and Applications on Auto Parts.....	1-(inside front cover)
[Example 15] An High Velocity Arc Spraying Technology Applied to Remanufacture Parts	2-(inside back cover)
[Example 16] Repairing the Worn Parts of Driving Enclosure in the Shield Tunneling Machine by Controllable Flux-cored Wire-Welding	3-(inside back cover)
[Example 17] Application of Continuous Coating Technology on the Surface of Engineering Plastics.....	4-(inside back cover)
[Example 18] The Laser Cladding Technology Applied to the Remanufacturing of Mining Machinery Equipment	5-(inside front cover)
[Example 19] Low Temperature Hypersonic Velocity Spraying Tungsten Carbide Applied to Remanufacturing of Paper Equipment Corrugating Rolls	6-(inside front cover)
